# Best Practices for Integration

## Description

This online instructor-led course is designed to understand the best practices to integrate your processes applications: the most important guidelines to use Synchronous Interfaces, the best practices for Asynchronous activities, and the most important recommendations to use Web Services, Connectors, and Component Libraries.

It introduces a series of tips and tricks to apply the best practices to integrate your process applications.

## Objectives

- Understand the most important guidelines to use Synchronous Interfaces
- Recognize the most important guidelines to use Asynchronous activities
- Understand the best practices associated with Web Services, Connectors and Component Libraries

## Topics

- Introduction
- Synchronous Interfaces
- Asynchronous activities
- Web Services
- Connectors
- Component Libraries

## Recommended Audience

This course is aimed at professionals who are involved or interested in the development of process automation projects.

- Architects
- BPM developers

## Duration

2.0 hours

## How it works

- The course is led by an expert consultant in Bizagi
- All sessions of the course will be performed on consecutive days
- The number of participants will be limited

## Requirements

- Internet connection
- The session will be delivered using Adobe Connect. Check your computers and network connections using this [Adobe Connect diagnostic test](#)
